

Dear Valued Customer;

Welcome to AMP Security.

As of September 1<sup>st</sup>, 2022 AMP Security has officially acquired Durst Tech Services, who had recently acquired Innovative Security. As another proudly local security, monitoring and automation company, at AMP Security we pride ourselves on providing exceptional, innovative solutions and we are eager to serve you.

### **AMP Security**

AMP Security is built on the foundation of two trusted technology companies, Tuckersmith Communications [TCC] and Hay Communications, with decades of experience in the Security & Automation industry. Powered by Alarm.com, AMP Security is able to provide a more current and innovated security solution for your home and/or business. You can visit AMP Security at [www.ampsecurity.ca](http://www.ampsecurity.ca) or contact their team directly at 519.263.2677. As a bonus, if you already have your home or business communication services through TCC or Hay Communications we will explore bundling options with you at your earliest convenience.

### **Moving Forward**

Your monitoring station will continue to be the Security Response Centre out of Sarnia. However, now if SRC contacts you it will appear as AMP Security. We will also be honouring monitoring that has been paid in advance. Any invoices sent after September 1st, 2022 will come from TCC.

One of our Customer Service Representative will reach out with a phone call in the coming weeks to answer any questions you may have regarding this transition or your current security monitoring service.

Sincerely,

Rob VanAaken  
President - AMP Security
